

SIDDHARTH KUMAR

+91-6202969798 | siddharthk1500@gmail.com | linkedin.com/in/siddharth-kumar-0938ab245 | Greater Noida, India

Professional Summary

Data Analyst with experience in SQL, Python, and Power BI for data cleaning, exploratory analysis, and dashboarding. Have worked with logistics, HR, and sports datasets and co-authored a conference paper on stress prediction using machine learning.

Education

Gautam Buddha University, Greater Noida, India
Bachelor of Technology in Information Technology; CGPA: 7.68/10

2022 – 2026

Technical Skills

Programming: Python (Pandas, NumPy, Matp), SQL
Analytics & BI: Power BI, Tableau, Advanced Excel (Pivot Tables, VLOOKUP, Charts)
Data: Data cleaning, ETL, EDA, KPI tracking, reporting
Databases & Cloud: Relational databases, Google Cloud Platform

Experience

Top Talent Bridge LLP – Data Analyst Intern Remote | Feb–May 2026

- Analysed candidate data and funnel metrics using Excel and basic SQL to understand conversion rates for roles in US and Canada.
- Built small dashboards that showed pipeline health (applications, interviews, offers) so consultants could guide clients towards better-fit roles.

Gautam Buddha University – Research Analyst (AIS2C2 2025) Greater Noida | Aug–Dec 2025

- Built a Python pipeline that cleaned USS-21 survey responses and lifestyle variables, then trained stress-level classification models.
- Compared Logistic Regression, Random Forest, and SVM, reporting accuracy and confusion matrices for the conference paper.

Gaint Logistics – Data Analyst Intern Remote | Jun–Jul 2025

- Queried shipment and route data in SQL to flag delays, repeat issues, and high-cost lanes for the operations team.
- Created Excel and Power BI views summarising daily on-time rate, delay minutes, and volume by route on a single page.

Projects

HR Attrition Analysis Oct–Nov 2025

- Used SQL and Python to explore how tenure, role, and pay bands related to employee exits.
- Designed a Power BI dashboard that HR could slice by department and location to monitor attrition risk.

Football Performance Analysis Dec 2025–Jan 2026

- Calculated player and team metrics such as Expected Goals (xG), shots, and conversion rates using SQL.
- Visualised chance creation zones and finishing efficiency in Power BI for coaches.

Awards, Certifications & Leadership

Awards: Lead author and presenter, “Stress Level Classification Using Machine Learning,” AIS2C2 2025 International Conference; selected participant, McKinsey Forward Program 2025.

Certifications: Deloitte Data Analytics Job Simulation (2025); Google Cloud Data Analyst Certificate (2025); Office Master Power BI Certificate (2025).

Leadership: GDG on Campus & MLSA, GBU – Management Lead (2023–2025): organised hackathons and workshops for 500+ students. Mirage – Film and Photography Society, GBU – General Secretary (2024–2025): led media team and budget for annual university festival.
